Welcome to KNOWARE, the computer software experience which combines entertainment, education, and useful applications! When you have completed your rise to chairman of the board and millionaire, you will be able to continue using the starter-kit applications programs which you have mastered during your climb up the corporate ladder. These programs include a spreadsheet, a text editor, a database system, a bar and pie chart program, financial programs, and others.

To access these applications independently, begin KNOWARE in the normal fashion. When you are asked if you have played the game before, type Y. Next, select the applications program option (choice 4) and press the enter key. The computer will instruct you to remove disk 1, insert disk 3, and press the enter key. You will then be able to select any of the programs directly, and use any files which you may create and store.
